SKILLS/ PROJECTS	**Language/Technologies** JavaScript |HTML |CSS |Sass |React |Redux |Vue |Bootstrap |Material UI |Git |TDD |TypeScript **Languages:** English and Spanish

Selected Projects:

E-Commerce Music Shop
- A full online e-commerce website that allows users to add items to the cart, input shipping address information, review, and self-checkout.
- Back-end integrated using ecommerce.js. Credit card transaction integration using Stripe.
- Built with **React** (**React-Router/React-Hook-Form**), **JavaScript**, **HTML/CSS,** and **Material UI**

Playlist Maker
- A website that allows users to search the Spotify library, create a custom playlist, name, and save it to their Spotify account using the Spotify API. Allows OAuth 2 Authentication login.
- Built with **React**, **JavaScript** and **HTML/CSS**

Place Finder
- A Yelp-like clone app that allows the user to search for Businesses using the Yelp API. Sort results by best results, highest rated or most reviewed.
- Built with **React, JavaScript** and **HTML/CSS**
